

This test consists of 50 multiple-choice questions. Each question is worth 2 points, for a total of 100 points. There is only one correct answer for each question.

—. **Vocabulary Sentence Completion (Questions 1–10)**

Instructions: Read each sentence carefully and choose the word that best completes the sentence.

1. The scientist was asked to _____ her findings in a way that non-experts could understand.
(A) simplify
(B) exaggerate
(C) dismiss
(D) complain
(E) memorize
2. Although the hotel claimed to be eco-friendly, its practices were far from _____.
(A) fragile
(B) harmful
(C) luxurious
(D) wasteful
(E) sustainable
3. The politician's statement was carefully _____ to avoid offending either side.
(A) postponed
(B) framed
(C) exaggerated
(D) misused

注意：背面有試題

- (E) ingested
4. His rude comment made the atmosphere in the room even more _____.
- (A) relaxed
(B) pleasant
(C) tense
(D) calm
(E) engaged
5. The new law will only be effective if properly _____ by local authorities.
- (A) ignored
(B) enforced
(C) delayed
(D) debated
(E) filed
6. She took a moment to _____ the situation before making her final decision.
- (A) exaggerate
(B) neglect
(C) overtake
(D) escalate
(E) evaluate
7. The two companies decided to _____ in order to expand their market share.
- (A) collide
(B) compete
(C) merge
(D) refund
(E) nurture
8. The artist is known for her ability to _____ emotions through abstract imagery.
- (A) tolerate

- (B) provoke
(C) distort
(D) convey
(E) stress
9. He gave a(n) _____ explanation that failed to address the real concerns.
(A) vague
(B) thorough
(C) articulated
(D) expanded
(E) logical
10. The conference aims to _____ dialogue between researchers from different disciplines.
(A) discourage
(B) foster
(C) oppose
(D) restrict
(E) observe

二. Cloze Test (Question 11-15, 16-20)

Instructions: Read the following passages. Choose the word or phrase that best completes each blank.

Global Tariff Policies

In 2025, President Donald Trump announced a sweeping trade policy aimed at reshaping America's global economic position. Under this plan, a 10% tariff was placed on most imports, with significantly higher rates targeting specific countries. China was hit with a 145% tariff, while Taiwan, Canada, and Mexico were also included in what the administration called a "strategic realignment."

According to the White House, the new tariffs were introduced to protect U.S. industries and reduce the trade deficit. However, critics argued that

the plan would _____ (11) both domestic businesses and international relations. Many American companies rely heavily on imported materials, and sudden price hikes made it difficult to plan production budgets.

Taiwan was particularly surprised by the decision, as it had long been considered a friendly trading partner. The U.S. government later offered a 90-day negotiation window, during which the tariff was temporarily _____ (12) to 10%. Still, Taiwanese officials expressed concern over the lack of communication and the unpredictability of U.S. policy.

Meanwhile, Canada and Mexico responded with cautious diplomacy. Although they avoided immediate retaliation, their leaders emphasized the need for stability and mutual respect in trade agreements. Analysts warned that inconsistent tariff policies could _____ (13) long-term investor confidence.

While the administration claimed the tariffs would encourage domestic production, some economists were skeptical. They noted that raising barriers to trade without improving supply chain resilience might only _____ (14) inflation and delay economic recovery.

To prevent further tension, many experts have recommended that the U.S. re-engage in international trade discussions. They emphasized that long-term economic growth is more likely to result from open markets and fair competition rather than from protectionist measures. However, this message may be difficult to promote amid growing political _____ (15) both domestically and internationally.

11. (A) isolate
(B) benefit
(C) disrupt
(D) negotiate
(E) reveal
12. (A) eliminated
(B) suspended
(C) enforced

注意：背面有試題

- (D) transferred
- (E) lowered
- 13. (A) inspire
- (B) damage
- (C) accelerate
- (D) evaluate
- (E) moderate
- 14. (A) regulate
- (B) resist
- (C) reduce
- (D) reject
- (E) regret
- 15. (A) consensus
- (B) uncertainty
- (C) tolerance
- (D) cooperation
- (E) independence

Neurodiversity

In recent years, the concept of neurodiversity has gained recognition in educational and professional settings. Neurodiversity refers to the idea that neurological differences, such as autism, ADHD, and dyslexia, are not "disorders" to be fixed but rather natural variations in how the human brain functions. Advocates argue that embracing neurodiversity helps create more inclusive environments and allows individuals to reach their full potential.

One of the key messages of the neurodiversity movement is that people with cognitive differences often possess unique strengths. For example, individuals with autism may show exceptional attention to detail, while those with ADHD can exhibit high levels of creativity and energy. However, these strengths are sometimes overlooked due to systems designed for so-called "neurotypical" individuals. As a result, many

neurodivergent people face challenges in accessing education or employment opportunities that truly _____ (16) their abilities.

To support neurodiversity, institutions are beginning to shift away from one-size-fits-all models. In classrooms, this might involve flexible teaching strategies, while in workplaces, it could include personalized job accommodations. The goal is not to “normalize” people, but to _____ (17) their differences as valuable and valid aspects of human diversity.

Critics argue that the neurodiversity approach may downplay the real struggles experienced by some individuals. But proponents respond that acknowledging challenges and promoting inclusion are not _____ (18). In fact, a neurodiversity framework encourages both support and empowerment, allowing people to succeed without being forced to conform to rigid norms.

As awareness spreads, more researchers and educators are exploring how to create environments that are genuinely inclusive. Rather than asking people to fit in, neurodiversity calls on institutions to _____ (19) and adapt. Only by doing so can society fully benefit from the talents of all its members and challenge outdated assumptions about intelligence, productivity, and behavior.

Ultimately, neurodiversity encourages a broader understanding of what it means to be “normal” and reminds us that variation is not just acceptable but it is essential for human progress and _____ (20).

16. (A) reflect
(B) limit
(C) suppress
(D) generalize
(E) replace
- 17 (A) ignore

注意：背面有試題

- (B) question
 - (C) replicate
 - (D) deny
 - (E) celebrate
18. (A) contradictory
- (B) identical
 - (C) achievable
 - (D) relevant
 - (E) reliable
19. (A) resist
- (B) accommodate
 - (C) isolate
 - (D) standardize
 - (E) interrupt
20. (A) tradition
- (B) safety
 - (C) innovation
 - (D) equality
 - (E) survival

三. Sentence Transformation (Questions 21–25)

Instructions: Read each original sentence. Choose the option that best preserves the same meaning of the original sentence.

21. Generative AI has raised concerns about originality and the potential misuse of machine-produced content.
- (A) Concerns about originality and misuse have emerged due to generative AI.
 - (B) Generative AI solves the problem of unoriginal content.
 - (C) Only human-generated content can be trusted as original.
 - (D) People no longer worry about how AI-generated content is used.
 - (E) Generative AI guarantees complete accuracy in all forms of content.
22. Unless carbon emissions are reduced, global temperatures will

- continue to rise.
- (A) If emissions increase, temperatures will drop.
- (B) Reducing carbon emissions is not necessary to affect the climate.
- (C) Global temperatures depend mainly on ocean currents, not emissions.
- (D) A reduction in emissions is needed to prevent further temperature rise.
- (E) Carbon emissions have no measurable impact on global temperatures.
23. Although social media connects people globally, it can also contribute to the spread of misinformation.
- (A) Social media prevents users from sharing incorrect information.
- (B) False information rarely spreads through social media platforms.
- (C) Social media helps global communication but may also spread inaccurate content.
- (D) Most people disconnect from social media to avoid misinformation.
- (E) Social media only spreads verified information from reliable sources.
24. Classified as endangered, the species maintains stable populations within certain protected regions.
- (A) The species is endangered because it only survives in protected regions.
- (B) The species has been reclassified as thriving due to conservation efforts.
- (C) The species is not endangered as long as it remains in protected areas.
- (D) The species has disappeared in all regions except protected ones.
- (E) The species thrives in protected regions despite being listed as endangered.
25. While Gen Z workers value flexibility and purpose in their jobs, they are also more likely to switch roles if their expectations are not met.

- (A) Gen Z workers rarely care about job satisfaction or meaningful work.
- (B) Gen Z workers are loyal to one employer if they receive regular promotions.
- (C) If a job lacks purpose or flexibility, Gen Z employees may choose to leave.
- (D) Gen Z employees tend to avoid work environments with remote options.
- (E) Most Gen Z workers prefer traditional 9-to-5 routines in stable companies

四. Dialogue Comprehension (Questions 26–30)

Instructions: Read the short dialogue. Choose the option that best answers the question.

26. *Professor: You've explained your research method clearly, but you haven't mentioned any possible limitations.*

Student: I thought that might make my proposal seem weaker.

Professor: Actually, pointing out limitations shows that you've thought carefully and makes your work more trustworthy.

What is the professor's main point?

- (A) The student's research method is too weak to be accepted.
 - (B) Highlighting limitations makes the proposal appear less reliable.
 - (C) The professor wants the student to shorten the research method section.
 - (D) Acknowledging limitations improves the academic quality of the proposal.
 - (E) The professor believes students should only focus on research strengths.
27. *Student A: Are you going to Dr. Yang's workshop this afternoon?*
Student B: I registered, but it overlaps with my lab meeting.
Student A: That's too bad. He's sharing his findings on AI in education.

What does Student B's response suggest about his intentions regarding the workshop?

- (A) He is not interested in Dr. Yang's topic.
- (B) He is planning to skip the lab meeting.
- (C) He forgot to register for the workshop.
- (D) He would attend if there were no schedule conflict.
- (E) He didn't know the workshop was happening this afternoon.

28. *Speaker A: I think we need stronger laws to protect personal data online. Too many companies exploit user information without clear consent.*

Speaker B: But overregulating tech companies might limit innovation. Startups especially can't afford to comply with complex laws.

Speaker C: Both of you make good points, but I believe transparency is the key. If companies are upfront about how they use data, people can make informed choices.

What is the central issue being discussed?

- (A) Whether new laws should be passed to protect personal data.
- (B) Whether data privacy concerns justify shutting down tech startups.
- (C) Whether user data should be sold to third parties.
- (D) Whether companies should invest in artificial intelligence tools.
- (E) Whether online advertisements should be banned altogether.

29. *Speaker A: I think preventive care should be prioritized. It's more cost-effective and leads to better long-term health outcomes.*

Speaker B: True, but some communities still struggle to access even basic care. Without addressing inequality, prevention isn't enough.

Speaker C: I agree with both of you, but I also think we need to invest more in mental health services, which are often overlooked.

What is the main challenge being discussed?

- (A) How to improve hospital management systems.
- (B) Whether doctors should receive better salaries in rural areas.
- (C) Whether physical health matters more than mental health.
- (D) Whether vaccines should be required.

(E) How to spend health care money when there are many needs.

30. Speaker A: I always try to buy from sustainable brands, even if it means paying a bit more. I think our choices should reflect our values.
Speaker B: That's admirable, but not everyone has the budget for that. Price is still the biggest factor for many people.
Speaker C: Honestly, I usually go with the brand I trust. If a company has been reliable in the past, that matters more to me than trends or price.

What does this conversation mainly highlight?

- (A) How advertising manipulates consumer behavior.
(B) Why consumers prefer international brands.
(C) The different factors that influence people's purchasing decisions.
(D) The need for more government regulation of consumer products.
(E) How online reviews are replacing traditional shopping habits.

五. Discourse Structure – Logical Flow (Questions 31-35)

Instructions: Read the sentences in each group. They are from a short article or paragraph. One sentence does not match the topic or logical flow of the others. Choose the sentence that does **NOT** belong.

31. Read the following sentences from a short article about scientific communication. One of them does **NOT** fit the logical flow of the passage. Which one is it?
- (A) Scientific knowledge grows through rigorous testing, peer review, and open debate.
(B) Communicating findings clearly helps prevent public misunderstanding of scientific issues.
(C) Some people believe that space exploration is a waste of taxpayer money.
(D) Researchers must ensure that their work is not only accurate but also accessible to non-specialists.
(E) Effective communication of scientific results can influence public policy and education.
32. Read the following sentences from a short paragraph about online

learning. One of them does **NOT** fit the logical flow of the passage.

Which one is it?

- (A) The earliest universities in Europe were founded in the 12th century.
- (B) Online platforms have increased access to education for learners in remote or underserved areas.
- (C) Flexibility in scheduling allows students to balance study with work and family commitments.
- (D) However, not all learners thrive in digital environments due to a lack of personal interaction.
- (E) Online education has evolved rapidly with the advancement of communication technologies.

33. Read the following sentences from a paragraph about exercise habits. One of them does **NOT** fit the logical flow of the passage. Which one is it?

- (A) Many people struggle to maintain a consistent workout routine due to busy schedules.
- (B) Establishing achievable fitness goals can help build long-term motivation.
- (C) Studies show that regular exercise reduces the risk of heart disease and diabetes.
- (D) Gym memberships in urban areas are often more expensive than in rural regions.
- (E) Home workout videos have become a popular alternative to going to the gym.

34. Read the following sentences from an academic email. One of the sentences does **NOT** fit well with the overall flow or purpose of the message. Which one is it?

- (A) Thank you for your thoughtful feedback on my draft.
- (B) I've attached a revised version that includes your suggestions on structure and clarity.
- (C) I would appreciate any further comments you may have before the

final submission deadline.

(D) I believe your feedback was not accurate and I plan to use a different reference style.

(E) Please let me know if you have time to review my revisions this week.

35. Read the following sentences from a short article about renewable energy. One of them does **NOT** fit the logical flow of the passage. Which one is it?

(A) Solar and wind power are increasingly seen as key solutions to the global energy crisis.

(B) Wildlife conservation efforts have helped restore habitats for endangered species

(C) Many governments are offering subsidies to encourage investment in clean technologies.

(D) Fossil fuel prices fluctuate due to geopolitical tensions in oil-producing regions.

(E) Energy storage solutions are crucial to stabilizing renewable energy supply.

六. Grammar: Sentence Completion (Questions 36-40)

Instructions: Choose the option that best completes each sentence.

36. The results of the experiment ____ published in a leading scientific journal.

(A) has

(B) were

(C) is

(D) be

(E) being

37. By the time she arrived, the lecture _____ already.

(A) started

(B) has started

(C) had started

(D) will start

- (E) would start
38. Neither the students nor the professor _____ aware of the schedule change until the last minute.
- (A) were
(B) are
(C) was
(D) be
(E) have been
39. The tech company admitted that the security breach _____ prevented if better encryption had been in place.
- (A) can be
(B) is
(C) will be
(D) has been
(E) should have been
40. Several humanitarian aid convoys were blocked from entering Gaza; _____, the shortage of medical supplies in hospitals has reached a critical level.
- (A) moreover
(B) consequently
(C) however
(D) otherwise
(E) in contrast

七. Reading Comprehension (Questions 41–45, 46-50)

Instructions: Read the following articles and answer the questions that follow.

Dajia Mazu Pilgrimage:

Taiwan's Living Cultural Heritage

Every spring, thousands of devotees in Taiwan participate in one of the most significant religious and cultural events in the country: the Dajia Mazu Pilgrimage. The nine-day, eight-night journey begins at the Jenn Lann Temple in Dajia, Taichung, and extends over 340 kilometers to the

Fengtian Temple in Xingang, Chiayi, before returning. The route passes through more than 20 towns and cities, drawing hundreds of thousands of participants and spectators alike.

The pilgrimage commemorates Mazu, a goddess and patron of sailors, revered for her protective powers. It traces its roots back to 1730, when worshippers first travelled south to pay homage to Mazu. Today, it is not only a deeply spiritual event but also a vibrant expression of Taiwanese folk culture. In recognition of its significance, the pilgrimage was designated an intangible cultural heritage by Taiwan's Ministry of Culture in 2010.

Participants walk for days, stopping at various towns to rest, pray, and receive offerings from local residents. Communities along the route prepare free meals, drinks, and shelter for pilgrims—a practice known as “báng-kah,” or voluntary hospitality. The pilgrimage fosters a sense of unity, belonging, and mutual support across regions.

In recent years, digital tools have enhanced the experience. Apps now allow users to track the position of the Mazu procession in real time, while livestreams enable remote followers to participate virtually. These technological innovations have helped preserve the tradition while expanding its reach to younger and global audiences.

41. What is the primary purpose of the Dajia Mazu Pilgrimage?
- (A) To attract international tourists to Taiwan
 - (B) To commemorate a historic military victory
 - (C) To honor the sea goddess Mazu and celebrate Taiwanese cultural traditions
 - (D) To raise funds for temple renovations
 - (E) To establish a political alliance among different regions
42. What does the passage suggest about the role of local communities during the pilgrimage?

注意：背面有試題

- (A) They provide food and shelter to participants.
 - (B) They compete to attract the largest crowd.
 - (C) They act as spectators only.
 - (D) They follow the entire route with the pilgrims.
 - (E) They regulate traffic and security for the religious procession.
43. According to the passage, what has helped modernize the pilgrimage experience?
- (A) Improved road infrastructure
 - (B) Enhanced weather forecasting
 - (C) International sponsorships
 - (D) Digital apps and online streaming
 - (E) Traditional boat rituals at each temple site
44. Why was the pilgrimage designated as an intangible cultural heritage in 2010?
- (A) Because it brings economic benefits to local temples
 - (B) Because it is a long-distance walk
 - (C) Because it represents both religious belief and folk culture
 - (D) Because it is no longer practiced widely
 - (E) Because it includes performances of traditional opera
45. Based on the passage, how has the meaning of the pilgrimage evolved over time?
- (A) It has become less spiritual and more commercial.
 - (B) It has grown into a broader cultural and communal event.
 - (C) It has remained solely a religious obligation.
 - (D) It is now limited to older generations.
 - (E) It has shifted to a private ritual conducted only inside temples.

Autonomous Vehicles and Ethical Decision-Making: 2025 Legal Updates

As autonomous vehicles (AVs) become more prevalent, critical questions arise regarding their decision-making processes during emergencies. While AVs aim to reduce traffic accidents through

advanced sensors and software, they may encounter complex moral dilemmas. For instance, in an unavoidable accident, should an AV prioritize the safety of its passengers or minimize overall harm, even if it endangers its occupants?

To address these challenges, engineers and ethicists collaborate to develop systems capable of making such decisions. Some advocate for utilitarian approaches that aim for the greatest good for most people, while others support deontological principles that adhere to strict moral rules. Cultural differences further complicate these decisions, as perceptions of ethical behavior vary globally.

In 2018, the Moral Machine experiment gathered global perspectives on AV decision-making, revealing significant cultural variations in ethical preferences. This diversity underscores the difficulty in establishing universal ethical guidelines for AVs.

Legal frameworks are also evolving. In 2025, the U.S. Department of Transportation introduced new regulations that streamline crash reporting requirements and expand testing access for AVs, aiming to balance innovation with safety oversight. Similarly, France mandated that all AVs be equipped with black-box recorders to analyze accident responsibility, enhancing transparency and accountability.

46. According to the article, how has the focus of autonomous vehicle discussions shifted in 2025?
- (A) From cultural studies to safety testing
 - (B) From software development to battery efficiency
 - (C) From ethical dilemmas to regulatory oversight and transparency
 - (D) From vehicle design to public relations
 - (E) From national regulation to international trade partnerships
47. What legal change did France introduce in 2025 regarding autonomous vehicles?
- (A) Mandatory nighttime curfews for AV testing

- (B) A ban on AVs in residential zones
 - (C) Mandatory driving tests for AV users
 - (D) A requirement for manual override systems in all Avs
 - (E) Installation of black-box recorders to track accident responsibility
48. Under the U.S. Department of Transportation's 2025 AV policy, what key aspect is emphasized?
- (A) AVs must include features to alert pedestrians of their presence
 - (B) AV manufacturers must ensure systems meet transparency and accountability standards
 - (C) Only electric AVs are allowed to operate in city centers
 - (D) Human drivers must remain in control at all times
 - (E) AVs must be equipped with multilingual voice assistants
49. According to the article, what challenge complicates the development of universal laws for autonomous vehicles?
- (A) Different countries have conflicting cultural views on ethical decision-making
 - (B) There is no global agreement on the cost of AV production
 - (C) Some countries ban AVs from using public roads
 - (D) Insurance companies refuse to cover AV-related incidents
 - (E) The lack of standardized AV design across manufacturers
50. Which of the following is **NOT** mentioned in the article as a factor influencing public acceptance of autonomous vehicles?
- (A) Clear ethical reasoning in emergency decision-making
 - (B) Cultural differences in moral perspectives
 - (C) Reduced carbon emissions and environmental benefits
 - (D) Transparent legal accountability for AV-related incidents
 - (E) Global diversity in ethical preferences revealed by the Moral Machine experiment

End of test.
